## Face to face in their first 100 days

Biden

Trump

### Bills signed into law

11      30

President Biden has signed fewer bills during his first 100 days than either President Trump or President Obama, but the list includes a whopper: the \$1.9 trillion COVID-19 relief package.

### Executive orders

41      33

Biden has signed more executive orders during his first 100 days than any recent predecessor. They were targeted at immigration policies and gender discrimination, among other things, and set up a presidential commission to study the Supreme Court's composition.

Trump used his early orders to launch his administration's effort to repeal the Affordable Care Act, impose travel bans and to create a task force on crime reduction and public safety.
